

NOTE FOR THE FILE

On 23 August 1971 at 1045 hours Victor Zorza called to plead his case for access to our unclassified material and to analysts working on the topic. After listening to more than ten minutes of his discussion, I reconfirmed the Director's decision about ^{not} giving him the access he requested. I assured him that the unclassified FBIS periodical on Soviet cybernetics was or would be available to him through the Library of Congress. Needless to say, he was disappointed.
